OBJECTIVE

An enthusiastic engineering student with a strong interest in software development and AI, eager to turn ideas into reliable and scalable applications by applying solid programming fundamentals, problem-solving skills, and hands-on experience from real-world projects.

EDUCATION

B.E MECHANICAL ENGINEERING - Bannari Amman Institute of Technology(CGPA Up to 5th Semester 7.15) Excepted 2027

HSC – Shree Gurukulam Higher Secondary School - 72% 2022 - 2023

SSLC – St.Mary’s Convent Matric Higher Secondary School - Passed 2020 - 2021

SKILLS

Programming Languages	C, Java, Python(Intermediate)
Libraries and Frameworks	Spring Boot,Node.js , Express.js
Web Technologies	HTML, CSS, JavaScript, TypeScript(Basics)
Databases	MySQL, MongoDB
Core CS	Data Structures & Algorithms, OOPs, DBMS(Basics)

PROJECTS

1.Resu-MindAI - AI-powered Resume Generator

Tech Stack : HTML | CSS | JavaScript | Node.js

Role: Team Coordinator

 **GitHub:** [Resu-MindAI](#)

Developed a dynamic web application that enables users to generate professional resumes through structured form inputs, with seamless frontend and backend integration to efficiently handle user data and resume generation. The application features responsive UI components to enhance user experience and accessibility, while also strengthening understanding of client–server communication and RESTful APIs.

1. CampusSportsBooking Projects

Tech Stack : HTML | CSS | JavaScript |TypeScript| Node.js | MongoDB

Role: Individual project

 **GitHub:** [SmartCampusSports](#)

Designed and developed a web application to manage sports slot bookings within a college campus, implementing features such as user authentication, real-time slot availability, and efficient booking management. Built backend APIs to handle users, bookings, and availability data, which enhanced understanding of full-stack development and database integration.

COURSEWORK

Python and AI Agents (Udemy) — 75% completed

• *Python programming, logic building, and basic AI agent concepts.*
